

ANTI-MICROBIAL SHADOW BOARDS

A shadow board is an organisational tool that enables you to segregate your workplace cleaning equipment, ensure that equipment is stored efficiently and hygienically, and promote accountability and reduce the risk of cross-contamination.

HOW IT WORKS

Our shadow boards are infused with a silver-ion based Biomaster Antimicrobial Technology. See page 4 for more information about Biomaster.

DID YOU KNOW?

A shadow board is co-extruded (two or more materials are sealed together by heat) and can be recycled at the end of its life at appropriate facilities.
