

# NEW ZEALAND BRUSH CO

INNOVATIVE BRUSHWARE SINCE 1886

## The Hygiene Range

# 0800 692 787

[www.nzbrush.co.nz](http://www.nzbrush.co.nz)

NZ Brush are exclusive agents for the Hillbrush hygiene range in NZ

Hill Brush was established in 1922 by brothers, Fred and Bill Coward. Hill Brush Hygiene is an internationally renowned brand, responsible for pioneering technologies including Resin-Set DRS® Brushware, Total MDX and Anti-Microbial Hygienic Tools™.

#### European Commission Regulation (EC)

Hillbrush Hygiene Technology products comply with the requirements of the European Commission Regulation 1935/2004/EC (Framework Regulation). Regulation 2002/72/EC. Regulation 2023/2006 and Regulation 10/2011/EC and subsequent amendments, and updates. **Under Regulation 10/2011/EC Materials intended to come into contact with foodstuffs are not allowed to transfer toxic substances via migration when in contact with food.** Hillbrush Hygiene Technology products are specifically designed for the food industry, and are 100% compliant with this requirement. All our products have been tested by a certified laboratory, furnishing documentation that our products are complying with the migration limits laid down by EU legislation, set up under regulation 10/2001/EC.

FDA (Food and Drug Administration in the USA)

All Hillbrush Hygiene Technology products are made using FDA Approved raw materials. Code of Federal Regulations

21 CFR 177.1520  
21 CFR 176.170  
21 CFR 177.1660

Mops	37-38
Washdown Equipment	39
Cutting boards and Knives	40-41
Custom Made Items	42
Scrubber & Sweeper Brushes	43
Household Brushware	44-46
Resistance Guide	47-48

The company has kept its local ownership and has become a highly successful firm based in Dunedin over 125 years after the settlement of Alfred Carter Broad (AC). His inherited skills have remained, providing employment for the people of Dunedin and supply of quality brushware for industry and commercial use throughout New Zealand.

We are renowned for our:

- Quality Brushware
- Easy Online Purchasing
- Custom Design Option
- Fast Turnaround

Select from a wide range of products, whether you need an engine cleaning brush or a baby bottle brush, you have come to the right place. Our service is unique, in that we can make a single special brush for you, or we can mass-produce a custom design. The NZ Brush Co. has a long tradition of making special brushes for special and unusual applications.

No order is too big or too small! Where necessary, we may be able to produce a sample at no cost to you, in order to ensure our finished product exactly matches your brush requirements.

We have the skills necessary to help you with your custom-made brush designs and to advise you on the best options available. More recently we have diversified our product range to include safety equipment and tools, including, safety gear, shovels, spades, rakes and our new hygiene range.

**WE CAN MAKE CUSTOM MADE  
BRUSHES THAT SUIT YOUR NEEDS**

# Shadow Boards

A shadow board is a bespoke organisation tool that enables companies and businesses to segregate the workplace cleaning equipment, to monitor the quality and whereabouts of each product, and more importantly in food service/processing situations, to avoid any cross contamination. Each board has a selection of product 'shadows' (single colour product image representations) printed onto it, with hooks or holders to secure the product in place (available separately). Each board can have a variety of products on, and is colour coded to help with segregation and monitoring

## KEY FEATURES

- Compact, hygienic design
- Easy to clean
- Available in 10mm "multiboard" PVC, 4mm ACM (aluminium composite) or full Anti-Microbial PVC (indented upon request from England)
- Wall mounted and portable formats available
- Single and double sided options available
- Customisable with your own logo and message.

Option to add your company logo

Fully customizable options available

## WHAT ARE THE KEY BENEFITS?

- Hillbrush shadow boards provide excellent workplace standardisation.
- Equipment life is maximised through the reduction of replacement costs by ensuring that the correct equipment is always available and in good condition.
- Improves colour coded segregation, allergen and equipment control within the site.
- Shadow boards are fully bespoke so can comply with any corporate branding for your company.
- Colour coded shadow boards are essential for good house keeping and reinforce the colour coding policy on site.
- The use of shadow boards raises employee accountability and cleaning standards whilst providing an integral part of continuous improvement.
- The shadow boards can be custom made to your needs and include your company logo and message. Simply send us an enquiry by contacting New Zealand Brush.

## WHAT MATERIALS ARE THEY AVAILABLE IN?

### PVC MULTIBOARD

- 10mm wall mounted boards
- Portable versions not available for PVC multiboards.

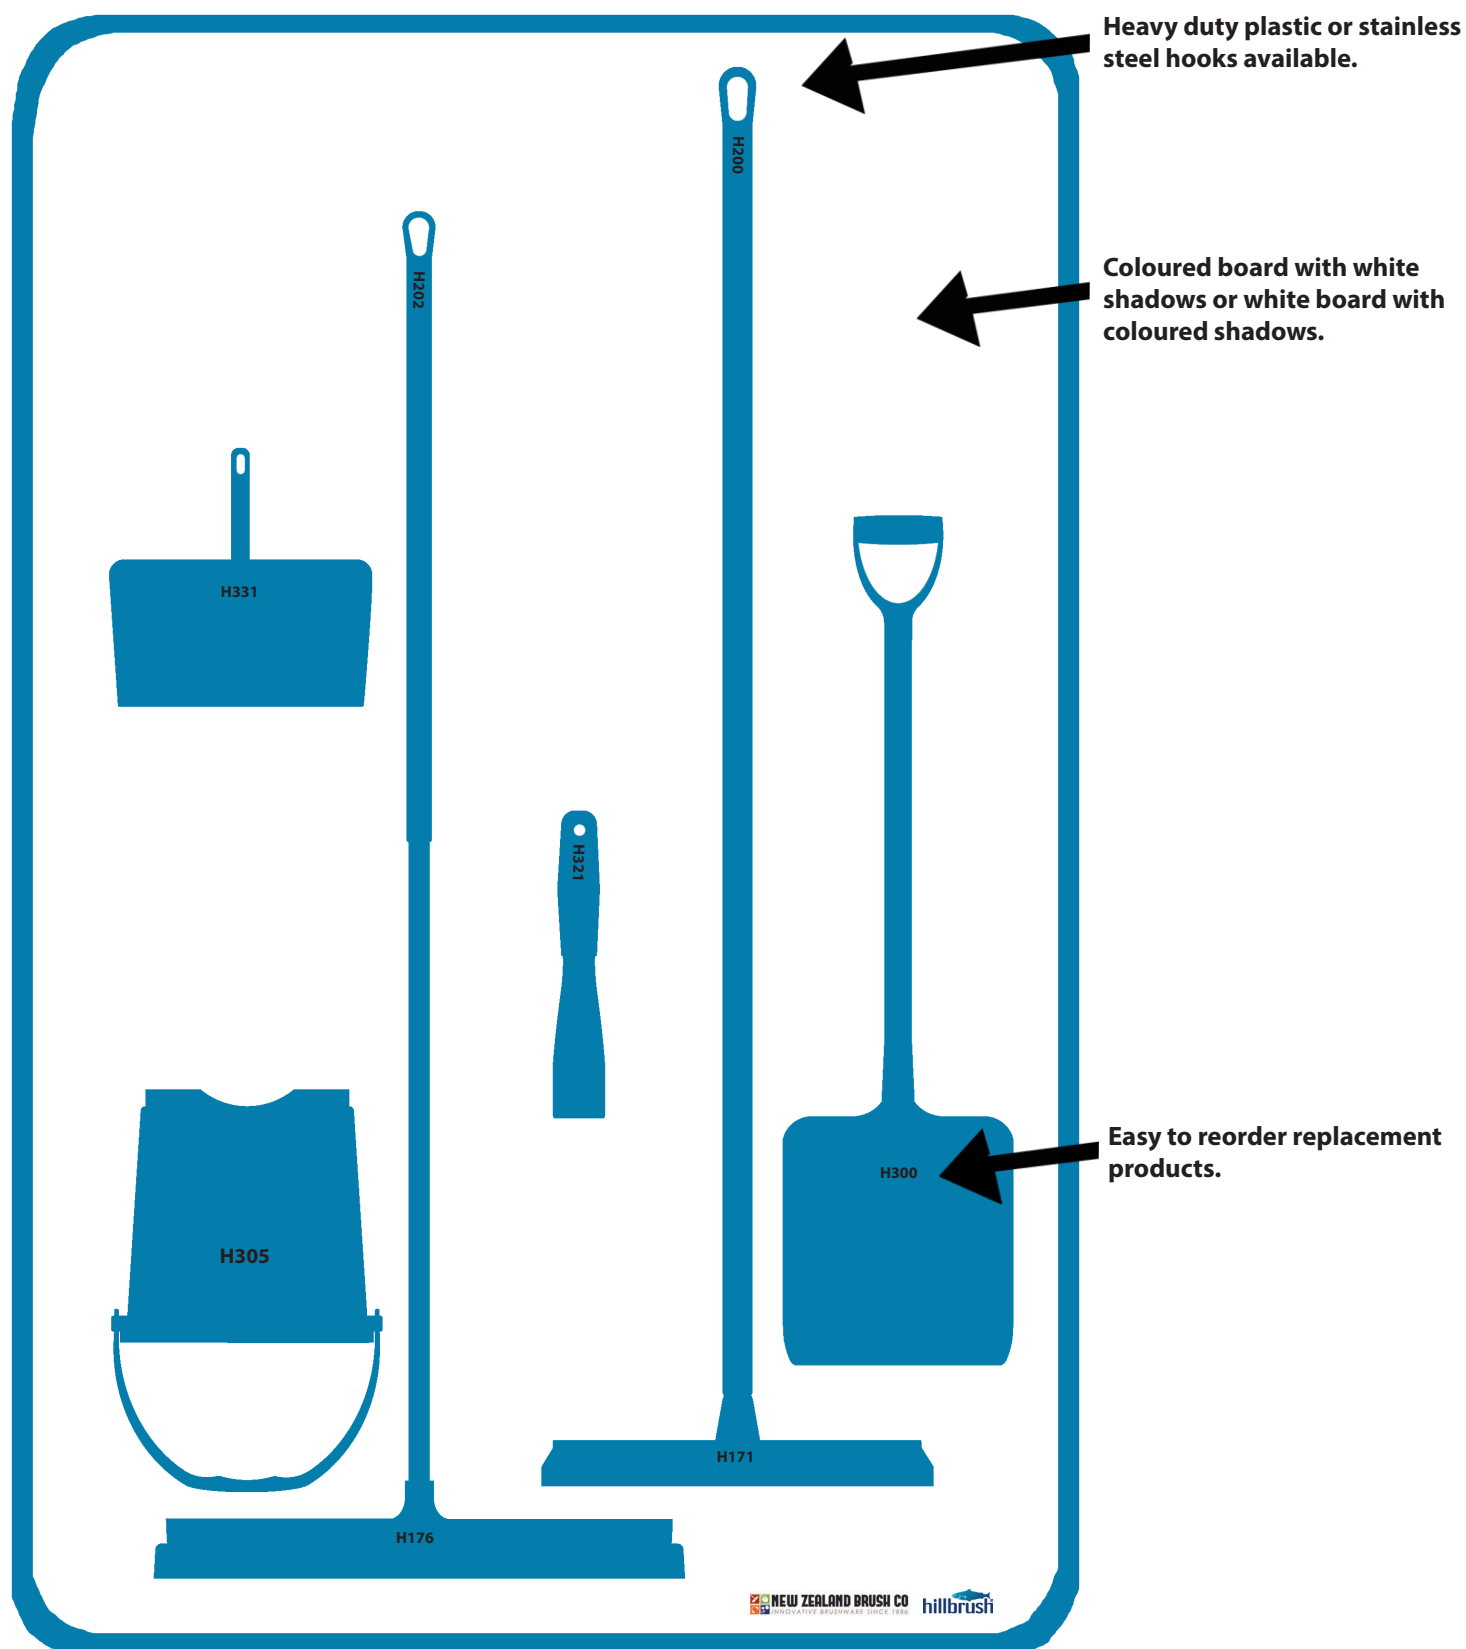

### ACM (Aluminium Composite)

- A standard wall mounted ACM (aluminium composite) board is 4mm.
- These boards are compact, hygienic, easy to clean, totally bespoke and are available as portable boards, if required.
- The wipe clean surface provides great protection from bacteria once cleaned, therefore minimising the risk of cross contamination.

### ANTI-MICROBIAL PVC (Indented Upon Request From The UK)

For the ultimate protection against contamination and the most efficient way of keeping your workplace clean and tidy, Hillbrush offers a fully anti-microbial shadow board in 3mm and 6mm PVC (polyvinyl chloride). These boards are manufactured from co-extruded PVC that has been infused with Biomaster Anti-Bacterial, Silver-Ion Technology. These boards offer a multitude of features including water and chemical resistance, fire proof and anti-static properties and are even recyclable at the end of their life.

## THE 5 STEP ORDER PROCESS

1. Contact your local rep and discuss your specific requirements.
2. Artwork is created and sent to you for approval.
3. Payment terms agreed.
4. Shadow Boards created.
5. Boards delivered to a New Zealand address.

## Custom Made Tube Brushes

### Minimum of 5

Tube Brushes are manufactured to your instructions.  
Length, Spread, Diameter and Tip Required

When ordering, please quote  
length x spread x diameter x tip  
type required.

All made to order tube brushes have stainless steel wire and Nylon 66 or PBT bristles.  
Up to seven colours available in PBT.

600mm x 250mm 88mm diameter  
Galvanized Wire  
Code - 72401

# RESIN-SET DRS® BRUSHWARE

The world's most effective and reliable method of filament retention, first developed in 1986. Resin-Set DRS® contributes to a longer product life and minimises the risk of filament loss, which can have severe consequences in the food manufacturing industry. Food-grade stainless steel staples secure the filaments into a recessed brush back, which is then flooded with an Anti-Microbial epoxy resin to complete the Dual Retention System (DRS). The product undergoes an extensive process to dissipate the resin into every crevice, eliminating areas for dirt and moisture to accumulate. All components are FDA/EU approved.

## The #1 Choice for the Food Manufacturing Industry

- ✓ Retention system twice as strong as fusing
- ✓ Excellent and reliable cleaning performance
- ✓ Most comprehensive range of its kind
- ✓ Proven track record over a 30+ year history
- ✓ Recommended by industry professionals
- ✓ 7 colours to support HACCP and 5S protocols
- ✓ Food contact approved by FDA and EU bodies
- ✓ Constructed from robust virgin materials
- ✓ Moulded and assembled by our expert team
- ✓ Autoclavable up to 134° Celsius

## THE #1 CHOICE FOR THE FOOD MANUFACTURING INDUSTRY

Hillbrush Resin-Set DRS® brushes use stainless steel staples to secure the tufts into a recessed brush back, which is then flooded with a food-contact approved epoxy resin. The resin is expertly dissipated between filaments to eliminate bacterial hotspots and is supported by Biomaster's renowned Antibacterial Technology additive.

VS

### IMITATION RESIN-SET

Resin floated on the surface with cavity unpenetrated and vulnerable to bacteria.

### HILLBRUSH RESIN-SET DRS®

Anti-microbial resin fully penetrates the cavity and inhibits bacterial growth.

# ANTI-MICROBIAL HYGIENIC TOOLS

Designed for areas that require exceptionally high standards of cleanliness and due diligence in controlling bacterial contamination. Each component contains Biomaster Antibacterial Technology, which uses a silver-ion base to inhibit bacteria including MRSA, E. coli, Listeria spp and Campylobacter. All components are FDA/EU approved.

Biomaster Antibacterial Technology present in every component

Biomaster  
protected  
surface

Bacteria can't  
survive on the  
product surface

Anti-Microbial epoxy resin  
completes the DRS process

Food grade stainless steel  
staples secure the filaments

## Metal & X-ray Detectable Items

Metal & X-Ray Detectable items made by two of the United Kingdom's leading manufactures, Detectamet & Hillbrush. Detectamet products are made from a range of materials that offer the best capabilities for food, beverage and pharmaceutical production environments that cannot always use a metal alternative.

Detectamet products are made with a proportion of a metallic magnetic trace element which is present in most cases throughout the whole object, this is at a size and concentration that allows a homogeneous flow throughout, ensuring that all parts are potentially detectable by metal detection systems without changing the physical properties of the object. Detectamet Products are designed to be Food Safe – not just Detectable.

### Resin

After being secured into the brush back, the filaments are then flooded with an Anti-Microbial epoxy resin to complete the Dual Retention System (DRS®). The products undergo an extensive process to dissipate the resin into every crevice, eliminating areas for dirt and moisture to accumulate. Even the resin in our Total MDX tools is detectable and has been independently tested for quality assurance.

### Colours

Our Total MDX range comes in Dark Blue, however we do have an economical alternative available in 4 colours that still ensures high risk component traceability.

### Recessed Brush Back

Polypropylene is light and durable. It is also a very stiff material and has good impact resistance. The polypropylene is light and durable so if any chips do occur, it can be detected to avoid any excessive or unnecessary product wastage.

### Ink

We print the Salmon® logo alongside the name and code for each product without the worry of the ink getting into the food by using food-approved ink.

### Staples

We use food-grade stainless steel staples to secure the filaments into the brush back. The steel staples are metal & X-ray detectable. The detectability isn't affected by moisture and they won't corrode or rust in a moist environment.

## Custom-Made Products

**Need something tailored to you specific to your needs?**

NZ Brush Co has a long tradition of making special brushes for special and unusual applications. Our service is unique, in that we can make a single special brush for you, or we can mass-produce a custom design.

Where necessary, we may produce a sample at a small charge or even at no cost to you, in order to ensure our finished product exactly matches your brush requirements.

We have the skills necessary to help you with your custom-made brush designs and to advise you on the best options available, often well below costly overseas products.

**For more information or for any enquires please phone: 0800 692 787 or email: [sales@nzbrush.co.nz](mailto:sales@nzbrush.co.nz)**

## Scrubber & Sweeper Brushes

**We manufacture and Refurbish brushes for all makes of scrubbers and sweepers.**
